SUBJECT INDEX

A

ABC-transporters, 296
Acetylaminofluorene adducts nucleotide excision repair and, 145
Acetyl-leu-leu-norleucinal 20S proteasome and, 819
Acyclovir viral mutants resistant, 761
Adenyl cyclase activation during *Drosophila* development, 422-25
Adherens junctions blocking assembly with antisera, 487
a-factor CaaX motif, 242-44
African swine fever virus DNA topoisomerase, 639
Aging and telomeres and, 355-57
Alkylating agents lethal and mutagenic effects O'-methylguanine-DNA methyltransferase and, 137
All-rich elements (AREs) eukaryotic gene expression and, 703-5
American Association for the Advancement of Science (AAAS), 10-11
Amikacin structure, 220
Amino acid transporters, 305-32 brain-specific, 321-22 CAT family, 308-14 cloning, 308-10 regulation of expression, 310-13 structure-function analysis, 313-14 glutamate family, 314-20 cloning, 314-16 distribution of expression, 316-18 regulation, 318 structure-function analysis, 319 glycine-specific, 322-27 GLYT family cloning, 323 GLYT1 isoforms, 323-25

GLYT2, 325-27
rBAT/4F2hc family, 327-31 cloning, 327-28 cystinuria and, 330-31 structure-function analysis, 328-30

Amphibians photoreactivating activity, 154
Anandamide gap-junctional intercellular communication and, 491

Animal lectins C-type, 462-63
Antibiotic resistance tuberculosis treatment and, 233-36
Antigen presentation proteasomes and, 835-38
Antizyme recoding, 746-48
AP endonucleases base excision repair and, 142
Aphidicolin DNA mismatch repair and, 108 nucleotide excision repair and, 151

Apo-TBP, 777-78
Arabidopsis telomere length strain-specific differences, 352

Arabidopsis thaliana TBP isoform 2, 777-78
AREs See All-rich elements

ASCT1 glutamate transporter, 319-20

Astrocytes gap-junctional intercellular communication inhibition, 491

Atkins, J. F., 741-63

ATP binding to type II DNA topoisomerases, 650-51 protein breakdown in cells and, 804

ATPase 26S proteasome and, 826-30

ATP synthase assembly, 589

Azorhizobium, 504

Azurin electron-transfer reactions, 551-54

B

Bacillus subtilis DNA photolyase and, 45 nucleotide excision repair, 47 proteasomes, 810
Bacteria cytoplasmic membrane protein translocation and, 271-98 homeologous recombination, 125-26 insertion sequence elements, 752 Sec61/SecYEcp complex, 276-78 selenocysteine insertion, 88

Bacteriophages DNA helicases, 170 Bacteriophage T4 gene 60 translational bypass, 758-59
Bacteroides ruminicola ribosomal bypassing and, 760 Barley yellow dwarf virus frameshifting and, 762 Base excision repair (BER), 17, 46, 137-44 completion pathways, 142-43 poly(ADP-ribose) polymerase and, 144

BER See Base excision repair

BIDS nucleotide excision repair genes and, 35

Bjornson, K. P., 169-210

Bladder cancer microsatellite instability and, 119

Blanchard, J. S., 215-36

Bradyrhizobium, 504

Breast cancer microsatellite instability and, 119

Brookhaven National Laboratory, 7-9

Burley, S. K., 769-96

C

CaaX motif, 242-44
CaaX proteins C-terminal processing, 253-55 prenylation, 245-50
Caenorhabditis elegans

- G protein β -subunit, 421
 mRNA decay pathways
 nonsense-mediated, 717-18
 recessive heavy chain mutants,
 714-15
 translocating-chain association
 membrane, 279
- cAMP
 intracellular
 gene expression in *Dicystostelium* and, 426
- Campylothein
 genome stability and, 670
- Cancer
 DNA mismatch repair deficiency and, 118-21
 p53 gene and, 72-73
 See also specific type
- Cancer cells
 telomerase activation and, 357-61
- Cap-binding proteins
 pre-mRNA splicing and, 401
- Capreomycin
 structure, 220
- Carassius auratus
 DNA photolysis gene, 154
- Carbohydrate-binding proteins
 lectins compared, 460-61
- Carbohydrate-lectin complexes
 three-dimensional structure, 444-45
- Carbohydrate-lectin hydrogen bonds, 447
 water molecules mediating, 451-52
- Carbohydrate-lectin recognition, 441-71
 divalent cations and, 453-54
- Carbonic anhydrase II
 osteopetrosis and, 762
- Carcinogens
 adducts
 nucleotide excision repair and, 145
- Casey, P. J., 241-65
- CAT transporter family, 308-14
 cloning, 308-10
 regulation of expression, 310-13
 structure-function analysis, 313-14
- CBZ-leu-leu-leucinal
 20S proteasome and, 819-20
- Cell cycle
 DNA excision repair and, 69-71
 DNA topoisomerases and, 675
- Cellular energy production
 regulation by cytochrome c oxidase, 569-71
- Cellular senescence
 telomeres and, 355-57
- Cervical cancer
 microsatellite instability and, 118-19
- cGMP
 chemotaxis in *Dicytostelium* and, 426-28
- Chaetomelic acid
 protein prenylation inhibition and, 260
- Chaperones
 26S proteasome and, 834
- Chaperonins
 mitochondrial assembly and, 587
- Chironomus tentans
 RNA synthesis

 Psoralea derivatives
 adducts
 nucleotide excision repair and, 144-45
 PTB-associated splicing factor
 pre-mRNA splicing and, 389-90
 Puromycin
 protein-conducting channel and, 282
 Pyrazinamide
 drug-resistant tuberculosis and, 232-33
 structure, 233
 Pyrimidine adducts
 nucleotide excision repair and, 144-45
 Pyrimidine hydrate-DNA glycosylase
 base excision repair and, 141
Pyrococcus furiosus
 DNA topoisomerase, 638
R
 Rab proteins
 membrane association, 258
 prenylation, 250-52
 RAD4
 DNA excision repair and, 150
 RAD14
 DNA excision repair and, 148-49
 RAD23
 DNA excision repair and, 150
 Rap1 protein
 telomeric DNA and, 349-50
 Rapoport, T. A., 271-98
 Ras proteins
 adenyllyl cyclase activation and, 424-25
 CaaX motif, 242-44
 rBAT/4F2hc transporter family, 327-31
 cloning, 327-28
 cystatin and, 330-31
 structure-function analysis, 328-30
 Reactive oxygen species
 as second messengers in retrograde regulation, 597-99
 Recoding, 741-63
 classes, 744-45
 history, 743-44
 REMI
 See Restriction enzyme-mediated integration
 Reptiles
 photoreactivating activity, 154
 Respiratory proteins
 function
 nuclear-mitochondrial contributions, 566-69
 Restriction enzyme-mediated integration (REMI)
Dictyostelium gene products and, 416
 Retroviruses
 codon redefinition and, 754
 frameshifting and, 749-51
 Rhizobium
 infection and nodulation of legumes, 504-6
 lipo-chitoooligosaccharide nodulation factors, 503-31
 nodulation genes, 506
Rhodobacter sphaeroides
 photosynthetic reaction center structure, 556

910 SUBJECT INDEX

- Rhodococcus*
proteasomes, 810-11
- Rhodopsin kinase
farnesylation, 257-58
- Ribosomal frameshifting, 745-53
- Rifampicin
drug-resistant tuberculosis and, 221-23
- RNA helicases, 172
ATP-dependent
pre-mRNA splicing and, 398-99
- RNA polymerase
eukaryotic, 770-71
telomerase and, 342
- RNA polymerase II
basal transcription proteins
nucleotide excision repair in eukaryotes and, 30-32
- DNA transcription and, 19-23
transcriptional arrest on transcribed templates, 23-24
- transcription factor IIH and, 150-51
- transcription initiation
regulated, 789-94
- RNA processing
mitochondrial transcription and, 580-82
- RNA synthesis
DNA topoisomerases and, 661
- RNA viruses
codon redefinition and, 754
frameshifting and, 752-53
- Roeder, R. G., 769-96
- Root cortex
cell cycle activation
nod factors and, 525-26
- Root epidermis
responses to nod factors, 522-25
- Rous sarcoma virus (RSV)
frameshifting and, 750
- RPA (HSSB)
DNA excision repair and, 55-57, 74, 149
- RSV
See Rous sarcoma virus
- Ruthenium complexes
electron-transfer reactions and, 540-41
- S
Saccharide-lectin recognition
structural basis, 443-61
- Saccharomyces cerevisiae
CaaX proteins, 254-55
cytochrome c oxidase
environmental regulation, 574-75
nuclear-coded subunits, 575-76
- DNA helicases, 170-71
- DNA ligase, 157
- DNA mismatch repair, 106-7
gene conversion and, 122
